Letters to the Editor

Why is the rapid burster different from all other galactic-bulge X-ray sources?
Milgrom, M. L1

First detection of SiO emission from circumstellar shells at the galactic centre
Lindqvist, M., Winnberg, A., Ukita, N., Johansson, L.E.B. L3

Detection of the hyperfine structure of the C_5H radical
Cernicharo, J., Guélin, M., Walmsley, C.M. L5

Discovery of continuum emission in the jet and of absorption in the filaments of the Crab Nebula
Woltjer, L., Véron-Cetty, M.-P. L7

Lithium abundance in two extreme high-velocity metal-poor halo dwarfs
Spite, M., Spite, F., Peterson, R.C., Chaffee, F.H., Jr. L9

EXOSAT observations of a broad absorption-line quasar: PHL 5200
Singh, K.P., Westergaard, N.J., Schnopper, H.W. L11

A blue ring-like structure in the center of the A 370 cluster of galaxies
Soucail, G., Fort, B., Mellier, Y., Picat, J.P. L14

The lithium abundance in the extremely metal-deficient dwarf G 64–12
Rebolo, R., Beckman, J., Molaro, P. L17

Constraints on the mass-radius relation for the neutron star in the X-ray burst source 4U/MXB 1820-30 located in the globular cluster NGC 6624
van Paradijs, J., Lewin, W.H.G. L20

The origin of QPO sources
Isern, J., Hernanz, M., Canal, R., Labay, J., Mochkovitch, R. L23

Cosmology

Stellar evolution with turbulent diffusion mixing. VII. Application to the determination of primordial ^{3}He abundance
Schatzman, E. 1

Extragalactic astronomy

Some inferences on chemical evolution from a study of irregular and blue compact galaxies
Vigroux, L., Stasińska, G., Comte, G. 15

Evolution of spiral galaxies in the Virgo cluster. II. Evidence for a threshold in star formation processes
Guiderdoni, B. 27

Circumnuclear star formation in the central region of the barred spiral galaxy NGC 1097
Hummel, E., van der Hulst, J.M., Keel, W.C. 32

The stellar population in the Wolf-Rayet knot in NGC 5430
Keel, W.C. 43

The central region of NGC 613. Evidence for an accelerated collimated outflow
Hummel, E., Jörsäter, S., Lindblad, P.O., Sandqvist, A. 51

(RN) Central velocity gradients and the classification of spiral galaxies
Baiesi-Pillastrini, G.C. 375

(RN) The Andromeda galaxy in γ-rays
Özel, M.E., Berkhuijsen, E.M. 378

Galactic structure and dynamics

Large degree stochasticity in a galactic model
Contopoulos, G., Varvoglis, H., Barbanis, B. 55

Stellar clusters and associations

Observational tests for stellar evolution and pulsation theory. I. The globular clusters M4 and M15
Caputo, F. 67

Formation, structure and evolution of stars

Measurements and study of rotational velocities in RS CVn star systems
Huisong, T., Xuefu, L. 74

The 35 day cycle of Her X-1: quality of the clock mechanism
Ögelman, H. 79

The Alfvén-gravity spectrum of an incompressible slab
Hermans, D., Goossens, M. 85

Phase transitions in stellar cores. II. Equilibrium configurations in general relativity
Zdunik, J.L., Haensel, P., Schaeffer, R. 95

Magnetic sturcture in cool stars. XI. Relations between radiative fluxes measuring stellar activity, and evidence for two components in stellar chromospheres
Schrijver, C.J. 111

Two-dimensional numerical models of the boundary layer of accretion disks in cataclysmic variables
Kley, W., Hensler, G. 124

A spectral study of the persistent X-ray flux from 4U/MXB 1636–53
Vacca, W.D., Sztajno, M., Lewin, W.H.G., Truemper, J., van Paradijs, J., Smith, A. 143

Four-colour photometry of eclipsing binaries. XXVI A. RY Aqr: a low-mass semidetached system with intrinsic variability
Helt, B.E. 155

2S 0918–549: optical identification and study of a new distant low-mass X-ray binary
Chevalier, C., Ilovaisky, S.A. 167

Photoelectric study of HD 96008: a close binary system or a new pulsating star?
Lampens, P. 173

Contact binaries. III. A survey of the equilibrium solutions and their stability
Kähler, H., Matraka, B., Weigert, A. 179

Spectroscopy of the primary and secondary components of the dwarf nova AH Herculis
Bruch, A. 187

Accretion-driven jets from young stars
Kaburaki, O., Itoh, M. 191

Stellar atmospheres

Stellar granulation. I. The observability of stellar photospheric convection
Dravins, D. 200

Stellar granulation. II. Stellar photospheric line asymmetries
Dravins, D. 211

IRAS far-infrared colours of normal stars
Waters, L.B.F.M., Coté, J., Aumann, H.H. 225

Stellar radius determination from IRAS 12 μm fluxes
Perrin, M.-N., Karoji, H. 235

Cyclotron line formation in a hot plasma including Compton cooling
Riffert, H. 241

Magnesium isotopes in super-metal-rich stars
Barbuy, B. 251

Li I-resonance-doublet observations and the abundance of lithium in Am and δ Del stars
Burkhart, C., Coupry, M.F., Lunel, M., van' t Veer, C. 257

Diffuse matter in space (including HII regions and planetary nebulae)

Condensation of small spherical non-gravitationally bound cool clouds
Parravano, A. 280

Jeans collapse in a turbulent medium
Bonazzola, S., Falgarone, E., Heyvaerts, J., Pérault, M., Puget, J.L. 293

SiO emission from the Orion KL region
Zeng, Q., Sun, J., Lou, G.F. 299

A polarimetric study of the Mon R 2 star-forming region
Hodapp, K.-W. 304

Deuterated ammonia in the Orion hot core
Walmsley, C.M., Hermsen, W., Henkel, C., Mauersberger, R., Wilson, T.L. 311

The Sun

Dynamics of solar filaments. V. Oscillations in the Hα and 1548 Å CIV lines
Malherbe, J.M., Schmieder, B., Mein, P., Tandberg-Hanssen, E. 316

Ground-based measurements of solar intensity oscillations
Jimenez, A., Pallé, P.L., Roca Cortés, T., Domingo, V., Korzennik, S. 323

Viscous damping of Alfvén normal modes in non-uniform plasmas
Mok, Y. 327

Meridional motions of sunspots from 1947.9 to 1985.0. II. Latitude motions dependent on spot type and phase of the activity cycle
Lustig, G., Hanslmeier, A. 332

The solar system

Detection of HCN in comet P/Halley
Winnberg, A., Ekelund, L., Ekelund, A. 335

Celestial mechanics and astrometry

Secular variations of the semimajor axes: theory and experiments
Milani, A., Nobili, A.M., Carpino, M. 265

Elliptic orbit of asteroid 1985 CQ1 and theoretical considerations
Debehogne, H. 342

Physical and chemical processes

Simple estimates for Stark broadening of ion lines in stellar plasmas
Dimitrijević, M.S., Konjević, N. 345

Approximate solutions to the cosmic ray transport equation: the maximum entropy method
Hick, P., Stevens, G. 350

Approximate analytical solutions of the Lane-Emden equation in *N*-dimensional space
Horedt, G.P. 359

Instruments, data processing, and computational methods

A new infrared camera for the 2–5 μm range
Monin, J.L., Vauglin, I., Sibille, F., Audaire, L. 368
